

Part 3 :

Reports Pack

Practice performance report

Key feature:

- ⇒ 1 parameter to define the report output – Date Range
- ⇒ Allows practice owners and managers to review Daily, Weekly or monthly practice performance on a single page!!
- ⇒ The report has three sections, reporting on **Front of Shop**, **Dispensary** and overall **Practice Summary**. Integra is the **ONLY** Pharmacy Management system in Ireland that provides a single Turnover figure for the practice, or group, as a whole.

Key benefit:

- ⇒ Report on performance over any period required
- ⇒ Review each of the four Front of Shops quadrants:
 - **Sales** –
 - **Media Receipts** – cash, cheques, credit cards etc. What the till says versus what was counted
 - **Accounts** – Credit given and payments received
 - **Sales KPI's** – How many transactions were completed, what was the average value achieved. €12 been a target value to achieve
- ⇒ Track and monitor Dispensary volumes.
Review overall Profitability. Very important at all times to keep an eye on costs versus sales but especially now.

Practice Performance Report

From Date : 03/01/2006

To Date : 03/01/2006

Front Of Shop

Sales:				Media Receipts:		
Gross Sales	Disc. & Refunds	Nett Sales	Projected	Shift	Closing	Diff
1945.03	112.80	1835.29	2123.27	1,374.77	1,437.27	62.50
Accounts:				Sales KPI:		
Account Sales	Account Payments	Difference		Qty	Ave Sales Value	
0.00	2087.98	2087.98		188	9.76	
(Qty: Number of receipts created in the report period. Ave. Sales Value: Total Nett sales (incl Scripts) divided by the total number of receipts)						

Dispensary

Practice sale analysis

Key feature:

- ⇒ 2 parameters to define the report output – Date range and Staff Member
- ⇒ Allows practice owners and managers to report on Monthly practice sales over 11 metrics, over 12 months over 3 years. This is a very powerful analytical report.
- ⇒ Metrics reported on:
 - Gross Sales Incl of VAT
 - Discounts & Refunds Incl of VAT
 - Nett Sales Incl of VAT
 - Nett Sales Excl of VAT
 - Cost of Sales
 - Gross Profit Margin
 - Number of items sold
 - Average sales value
 - Number of receipts issued (the number of transactions at the tills)
 - Average number of items per receipt (transaction)
 - Average Value per Receipt

Key benefit:

- ⇒ Track how the business has performed last month compared with the month before, or the same month last year
- ⇒ Track average sales values to maintain margins
- ⇒ Track performance of individual staff members
- ⇒ Ensure that Margins are been maximised each month and respond to dips.
- ⇒ Forecast dips in performance from previous years and take proactive action

Category sales analysis

Key feature:

- ⇒ 4 parameters to define the report output
- ⇒ The report lists the number of items sold, total sales value, the % of overall sales that this represents, Cost of those sales, actual profit and percentage margin for all categories or for a specified category.
- ⇒ In short, this report lets you see how each product group or category is performing in your practice

Key benefit:

- ⇒ At a glance, ensure that margins achieved are in-line with target. Categories that are identified as under-performing can have a Product Sales Analysis report run which will highlight the under-performing products within the stock category.
- ⇒ Products can be moved between categories with ease – Bulk Update module
- ⇒ Products moved keep their sales history
- ⇒ Promotions run for a given product group or sub-group can be tracked to assess the success of the promotion
- ⇒ Shelf space and product placement can be defined by reviewing category performance
- ⇒ This is the next most powerful report after the Practice Sales Analysis report.

Patient analysis

Key feature:

- ⇒ 9 parameters to define the report output
- ⇒ Allows users to report on which medications are been taking by a specified patient, a specified family or all patients, prescribed by who and in what Dosage.

Key benefit:

- ⇒ Very useful report when comparing Patient histories when making a dispensing decision
- ⇒ View prescribing patterns among Nursing Home patients in general or for a specified patient. The Product analysis report will only report on one item, where as the patient analysis report lists all items dispensed to Nursing Home patients.
- ⇒ Also useful for checking on Loaned or Owed items for a specified patient.

Stock take adjustments report

Key feature:

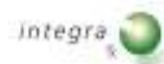

- ⇒ 1 Parameter to define the report output – Stock Take ID
- ⇒ Lists all products counted during the stock take and notes the Adjustment in Qty on Hand.

Key benefit:

- ⇒ This report allows practice owners and managers to review the consistency of order validation within the practice. If orders are not getting validated, there will be many Stock Adjustments on the report which means that the Cost of Sales value on many products may be compromised and therefore profit and margin calculates on other reports will not be accurate.
- ⇒ The Stock Adjustments report allows practice owners and managers to monitor general stock shrinkage and pilferage
- ⇒ Having floor staff run a Stock Adjustment report on their respective sections on a regular basis, ensures that Practice SOP's are been followed and that each section of the shop is been managed.

Simpler Faster Safer

MDS cassette sheet

Key feature:

- ⇒ Only required by Practices supplying medication to Nursing Homes where those homes employ a Nomand, or similar, weekly Cassette system
- ⇒ Once configured, this report is automatically generated for every patient in the home requiring medication for the current cycle

Key benefit:

- ⇒ Cheaper consumable costs. Integra Rx prints all forms to blank A4 paper, so no need to purchase expensive pre-printed fan-fold reams of paper
- ⇒ As Integra Rx does not require a dot matrix printer when printing reports, the print for Cassette sheets delivered to the Nursing Home is of a much higher quality. This reduces confusing in the nursing home, thus reducing calls to the practice and increasing patient safety

MEDICATION		FORM	DIRECTIONS	TIME				
				09:00	12:00	18:00	22:00	
7	INNOVACE TABS 5MG		ONE TO BE TAKEN DAILY Do not stop taking this medicine except on your doctor's advice. May cause dizziness. If affected, do not drive or operate machinery.	1				
7	ZYDOL CAPS 50MG		ONE TO BE TAKEN DAILY	1

MAR sheet monthly format (days horizontal)

Key feature:

- ⇒ Only required by Practices supplying medication to Nursing Homes where those homes have medication delivered monthly and require a MAR sheet for each patient
- ⇒ Once configured, this report is automatically generated for every patient in the home requiring medication for the current cycle
- ⇒ Each day number is listed horizontally across the page. Ideal for smaller nursing homes where only one nurse will be dispensing medication on any given day.

Key benefit:

- ⇒ Cheaper consumable costs. Integra Rx prints all forms to blank A4 paper, so no need to purchase expensive pre-printed fan-fold reams of paper
- ⇒ As Integra Rx does not require a dot matrix printer when printing reports, the print for MAR sheets delivered to the Nursing Home is of a much higher quality. This reduces confusing in the nursing home, thus reducing calls to the practice and increasing patient safety

R - Refused; H - Hospitalised; P - Pause Below 60/Minute; S - Sleeping; A - Absent From Home; O - Other; N - Nausea or Vomiting;

MAR sheet monthly format (days vertical)

Key feature:

- ⇒ Only required by Practices supplying medication to Nursing Homes where those homes have medication delivered monthly and require a MAR sheet for each patient
- ⇒ Once configured, this report is automatically generated for every patient in the home requiring medication for the current cycle
- ⇒ Each day number is listed vertically across the page. This would be considered the more standard MAR sheet used by Nursing Homes. Each dispensing for each day can be signed for.

Key benefit:

- ⇒ Cheaper consumable costs. Integra Rx prints all forms to blank A4 paper, so no need to purchase expensive pre-printed fan-fold reams of paper
- ⇒ As Integra Rx does not require a dot matrix printer when printing reports, the print for MAR sheets delivered to the Nursing Home is of a much higher quality. This reduces confusing in the nursing home, thus reducing calls to the practice and increasing patient safety
